Narayana Verlag is a publisher of books on homeopathy, alternative medicine, and healthy living. We publish works by top-class, innovative authors such as Rosina Sonnenschmidt, Rajan Sankaran, George Vithoulkas, Douglas M. Borland, Jan Scholten, Frans Kusse, Massimo Mangialavori, Kate Birch, Vaikunthanath Das Kaviraj, Sandra Perko, Ulrich Welte, Patricia Le Roux, Samuel Hahnemann, Mohinder Singh Jus, and Dinesh Chauhan.

Narayana Verlag organizes homeopathy seminars. World-renowned speakers such as Rosina Sonnenschmidt, Massimo Mangialavori, Jan Scholten, Rajan Sankaran & Louis Klein inspire up to 300 participants.

Aluminium silicata

Massimo's personal ideas about the case:- the matter of identity is very important. She is in a 'fusional' state. This is a fundamental part of our life in all mammals. It's one of the main reason why mammals are mammals. Many other animals don't have this stage at all to them, their mother does not exist in the same way. Even though it appears that there are two different individuals, one of them is completely fused with the other one. A baby may be out of the womb, but it is as dependent as if it was inside. Humans

are interesting because mammals that are easy victims of predators need to be able to walk, run and escape as soon as possible. A human baby can't survive on its own for a long time⁵⁴. When this fusional state is prolonged, it becomes pathological.

The symptoms of several aluminium salts are a clear demonstration of this kind of state. *Aluminium* cannot become detached from his mother. If the mother is not alive, it will be projected onto someone else who plays the same role.

Very often you don't find these kind of bursting symptoms in *Aluminium* salts but more aggressive symptoms in other directions - they are mostly self-reverted, like in the case of *Silica*.

Specifically in the case of *Aluminium siicata*⁵⁵ you have the symptoms of fear of blood and fear of cutting and many other symptoms like a fear of committing a crime, delusions of doing something wrong, etc. In *Aluminium* there is a strong desire of being able to express, to act your own identity with a clear feeling that you are still in such a strong, deep fusional state that it is impossible for you to cut this umbilical cord. It's a real symbiosis. The feeling is that if they cut this connection, it's not only a crime but it's like cutting the self. It's like cutting off the support and cutting off something that makes them able to survive.

It's a symbol of the Siamese twins. As if these two people are living with only one heart or one liver. The idea is that if they cut this, they will finally get rid of this kind of mother, but they will die as well.

Aluminium always has to do with someone in a deep fusional state, going on for years with this kind of persecutor (usually the mother) and they cannot get rid of this feeling inside that if they cut the relationship, they will die as well.

In *Aluminium siicata* this problem is much stronger. And it has to do with a support that is completely unreliable. They move on through life with a very heavy burden on the shoulders that it is not possible at all to get rid of.

⁵⁴This is slightly different now that we can feed a baby with artificial milk.

⁵⁵ This remedy is like three times *Aluminium*. It underlines the main concepts of *Aluminium*.

Contents

Case Taking..... I	The Carbons.....80
Case Analysis 3	Extraction where four carbons appear . 80
Case I6	Magnesia carbonica87
Equisetum hyemale 11	Case 1387
Case 2 15	Magnesia muriatica90
Bambusa arundinacea..... 19	Case 14.....91
Case3.....22	Magnesia sulphurica95
Case 425	Fundamental themes of Magnesium salts96
Castor equi..... 28	Case 1598
Case 5.... ,31	Magnesia fluorata..... 101
Aluminium silicata 35	Case 16103
The S//ca-like Family 37	Magnesia iodata105
Comparison between Aluminium, Silica and Aluminium silicata..... 40	Case 17107
Case 642	Colocynthis.....110
Insecurity..... 46	Luffa operculataIII
The Kalis..... 46	Comparison between Luffa operculata and Colocynthis.....113
Kali silicum..... 48	Case 18..... 113
The Arsenicum Salts 50	Carbo vegetabilis116
Case/52	Concepts and Themes118
Sphingurus martini 55	General Concepts of Carbons.....I 19
Comparison of <i>Sphingurus</i> and <i>Natrum muriaticum</i> 58	Carbon and Silica-like differentiation... 121
CaseS..... 59	Case 19 — Carbo animalis122
Case 9..... 60	Case 20 - Germanium I.....125
Case 1061	Case 21 - Germanium 2.....129
Calcarea silicata.....63	Case 22-Adamas I 131
Themes of the Silica-like 64	Case 23-Adamas 2 134
Case I 165	Comparison of Germanium and Adamas136
The Magnesium Salts..... 71	Seminar Review and Discussion136
Magnesia phosphorica..... 74	Index... ..138
Case 12.....76
