Narayana Verlag is a publisher of books on homeopathy, alternative medicine, and healthy living. We publish works by top-class, innovative authors such as Rosina Sonnenschmidt, Rajan Sankaran, George Vithoulkas, Douglas M. Borland, Jan Scholten, Frans Kusse, Massimo Mangialavori, Kate Birch, Vaikunthanath Das Kaviraj, Sandra Perko, Ulrich Welte, Patricia Le Roux, Samuel Hahnemann, Mohinder Singh Jus, and Dinesh Chauhan.

Narayana Verlag organizes homeopathy seminars. World-renowned speakers such as Rosina Sonnenschmidt, Massimo Mangialavori, Jan Scholten, Rajan Sankaran & Louis Klein inspire up to 300 participants.

Preface

I have had three main reasons for writing this book. The first is that a book I published some years ago, entitled *Before the Vet Calls*, is now out of print. (It was renamed in later editions *Homeopathic First Aid Treatment for Pets* for the American market, because the word 'vet' there refers to a veteran of their armed forces.) It was relatively short and written to satisfy a perceived demand for a basic introduction to homeopathy for the care of pet animals.

It now seems appropriate to produce this more comprehensive work to meet the needs of the increasing number of people who are interested in complementary therapies, and who are also much more widely informed on the potentially beneficial role of homeopathic medicine both for themselves and their animals.

The first major section covers the general problems that are common to all species, beginning with an initial section in flowchart form on accidents and emergencies. The greater scope of this new book has allowed me to provide information outlining the principal diseases and conditions specific to the different animals that are included. These sections are quite concise and indicate the various options available to treat the given condition, including references back to the general part of the text wherever relevant.

My second reason is to point out to the owner of an animal not only the benefits but also the limitations of homeopathic treatment, or for that matter of any other form of complementary treatment. It is a great mistake to embark on the treatment of an animal without sufficient knowledge of the intricate make-up of the animal as a patient, and without the training and expertise to be able to instigate the correct treatment. The average person would not even contemplate the idea of inserting acupuncture needles into an animal, and the argument holds equally well against giving a homeopathic remedy without the experience to do so. I have attempted to point out to the reader when it is appropriate to treat an animal oneself and when it is necessary to seek veterinary advice.

The third reason is that I have greatly admired the book *Everyday Homeopathy* by the late Dr David Gemmell. In addition to being an experienced and sympathetic general practitioner, Dr Gemmell was also the medical registrar at the Royal London Homeopathic Hospital for a number of years. He was a first-class

Preface

teacher, and I had the pleasure of being one of his students when I was studying homeopathy at the Faculty of Homeopathy in the early eighties. In his book, which he wrote for use within the family and among friends, he had the novel idea of describing a disease or condition on the left-hand page, and then on the facing right-hand page matching the different symptoms with the most appropriate remedy. This makes it simple and straightforward for the reader to be directed to the remedy most likely to be helpful, and I am very grateful to Mrs Irma Gemmell for permitting me to adopt this layout as fully as possible in the present book.

Contents

Preface	vi
Introduction	1

ACCIDENTS, EMERGENCIES AND FIRST AID 9

Animal bites	9
Bleeding	10
Broken bones	12
Bruises, haematomas	14
Burns and scalds	16
Collapse	18
Concussion	19

Accidents, Emergencies and First Aid

ANIMAL BITES

The canine or eye teeth of animals who bite when they attack or defend themselves are very sharp and pointed. They can cause deep puncture wounds which may appear to heal quickly, but because the teeth carry bacteria on their surface, infection may develop beneath the scab causing heat, swelling and pain.

- Lacerated, large wounds; deep, painful wounds. Immediate veterinary attention necessary.
- Small bites. Use remedies, but seek advice if infection seems to be present.
- Horses. If in doubt consult a vet.

By Mouth

If the fight has just occurred and there is shock associated with the bites.

Aconite 30c. Dose every 15–30 minutes up to 4–6 times as required.

This remedy follows Aconite well, or may be used from the outset if little or no shock is apparent.

Arnica 30c. Dose every 1–2 hours up to four doses, then 3–4 times daily for a few days until improved. Arnica is indicated and helpful whenever there is tissue damage, inflammation or bruising.

If pain is evident. The signs of pain may be loss of appetite, restlessness, dullness, panting, or constantly licking or gnawing at the affected place.

Hypericum 30c. Dose 3–4 times daily for 2–4 days until improved.

These two remedies help to reduce infection and promote healing.

Calendula 6c and Ledum 6c. Dose every fifteen minutes for an hour and then 3–4 times daily for 3–5 days.

ANIMAL BITES (continued)

Application to the Wound

To cleanse the wound, apply **Calendula lotion** 3–4 times daily as necessary. To promote healing when the wound appears to be clean, use **Hypericum/Calendula Cream**. Apply 2–3 times daily until healed.

BLEEDING (Haemorrhage)

The loss of some blood after any accident or injury is natural and helps to cleanse the wound, but it should not continue for too long. A trickle of blood for 5–10 minutes is acceptable but by the end of this time the blood should have begun to form a clot. Such bleeding will be from small blood vessels and is of little consequence. Bleeding from larger vessels is much more serious and professional help should be sought immediately. Such blood may be coming from an artery or a vein.

The blood in the arteries contains oxygen and is bright red in colour. It tends to be pumped out as the heart and pulse beat. The blood from veins is being returned to the heart from the tissues and has given up its oxygen. This blood is a dark red or wine colour and tends to flow rather than pump from the injury. If the bleeding appears severe it is probably coming from a major vessel. In such a case pressure should be applied to stop excessive blood loss while help is summoned. It may simply be a pressure pad or bandage; in the case of a limb, a cord fitted tightly round above the wound (a tourniquet) will help to stop the bleeding if an artery has been damaged.

- Blood oozing or trickling. Use remedies, but seek advice if bleeding persists.
- Pumping, bright, red blood. Flowing dark, red blood. Immediate veterinary attention necessary.

BLEEDING

For shock.

Aconite 30c. Start immediately and dose every 15–30 minutes for up to 4 doses.

Use if bleeding due to an injury, or if bleeding has occurred previously and is only slight. Useful for bleeding from the tips of the ears or from the end of the tail, or any other small wound. that cannot easily be bandaged.

Arnica 30c. Dose every 4 hours for 1–3 days as required.

For dark, unclotted, persistent, but not copious bleeding.

Hamamelis 6c or 30c. Dose 3 times daily for 3–5 days.

Use when the animal is weak after bleeding a lot.

China Officinalis 30c. Dose every 4 hours for 1–2 days.

For bright, red persistent bleeding.

Ipecacuanha 30c. Dose every 30–60 minutes up to four doses, then 3–4 times daily for a day or two if necessary.

For superficial and slight haemorrhages, especially those that tend to recur but are not serious (e.g. slight nosebleeds).

Phosphorus 6c. Dose every 30–60 minutes up to four doses, then 3–4 times daily for a day or two if necessary.

General Index

Advice to the reader. Some symptoms are so common that the index can be of only limited use, unless the page number refers to a chapter. Common symptoms include: biting or scratching itself, diarrhoea and vomiting, dullness, rubbing, shock, temperature. The search for a remedy may go faster if you can also find a less common symptom.

Preface

I have had three main reasons for writing this book. The first is that a book I published some years ago, entitled *Before the Vet Calls*, is now out of print. (It was renamed in later editions *Homeopathic First Aid Treatment for Pets* for the American market, because the word 'vet' there refers to a veteran of their armed forces.) It was relatively short and written to satisfy a perceived demand for a basic introduction to homeopathy for the care of pet animals.

It now seems appropriate to produce this more comprehensive work to meet the needs of the increasing number of people who are interested in complementary therapies, and who are also much more widely informed on the potentially beneficial role of homeopathic medicine both for themselves and their animals.

The first major section covers the general problems that are common to all species, beginning with an initial section in flowchart form on accidents and emergencies. The greater scope of this new book has allowed me to provide information outlining the principal diseases and conditions specific to the different animals that are included. These sections are quite concise and indicate the various options available to treat the given condition, including references back to the general part of the text wherever relevant.

My second reason is to point out to the owner of an animal not only the benefits but also the limitations of homeopathic treatment, or for that matter of any other form of complementary treatment. It is a great mistake to embark on the treatment of an animal without sufficient knowledge of the intricate make-up of the animal as a patient, and without the training and expertise to be able to instigate the correct treatment. The average person would not even contemplate the idea of inserting acupuncture needles into an animal, and the argument holds equally well against giving a homeopathic remedy without the experience to do so. I have attempted to point out to the reader when it is appropriate to treat an animal oneself and when it is necessary to seek veterinary advice.

The third reason is that I have greatly admired the book *Everyday Homeopathy* by the late Dr David Gemmell. In addition to being an experienced and sympathetic general practitioner, Dr Gemmell was also the medical registrar at the Royal London Homeopathic Hospital for a number of years. He was a first-class

Preface

teacher, and I had the pleasure of being one of his students when I was studying homeopathy at the Faculty of Homeopathy in the early eighties. In his book, which he wrote for use within the family and among friends, he had the novel idea of describing a disease or condition on the left-hand page, and then on the facing right-hand page matching the different symptoms with the most appropriate remedy. This makes it simple and straightforward for the reader to be directed to the remedy most likely to be helpful, and I am very grateful to Mrs Irma Gemmell for permitting me to adopt this layout as fully as possible in the present book.

Contents

Preface	vi
Introduction	1

ACCIDENTS, EMERGENCIES AND FIRST AID 9

Animal bites	9
Bleeding	10
Broken bones	12
Bruises, haematomas	14
Burns and scalds	16
Collapse	18
Concussion	19
Eye injuries	20
Head injuries	22
Heatstroke	24
Insect bites and stings	26
Shock	28
Sprains and strains	30
Wounds	
– Abrasions, scrapes and grazes	32
– Cuts and lacerations	34
– Infected	36
– Punctured	38

GENERAL CONDITIONS 41

Abscesses	42
Allergies	44
Anaemia	46
Anxiety	46
Appetite	48
Arthritis	50
Bad breath	52
Bronchitis	54
Catarrh	56
Chills and colds	58
Colic	60
Colitis	62
Constipation	64
Coughs	66
Cystitis	68
Dandruff	68
Dermatitis	70
Diarrhoea	70
Dysentery	70
Ear conditions	72
Enteritis	75
Eye conditions	77
Fear, fright, apprehension, panic	80
Fever	82
Fits, hysteria, epilepsy, convulsions	84
Flatulence	85
Fleas	85
Flu	88
Gastritis	90
Gum inflammation	90
Heart conditions	92
Hepatitis	94
Incontinence	95

Contents

Indigestion 97
Inflammation 98
Jaundice 100
Kidney disease 102
Lameness 104
Leptospirosis 105
Lice 106
Mange 108
Mastitis 110
Mouth 112
Nails 114
Nettle rash 114
Nose 116
Operations 118
Pain 120
Paralysis 122
Pleurisy 124
Pneumonia 126
Restlessness, sleeplessness 128
Rheumatism 130
Ringworm 132
Salmonellosis 134
Senility 136

Septicaemia 136
Sinusitis 138
Skin conditions 140
Snakebite 146
Sneezing 146
Stroke 148
Teeth 148
Thirst 150
Ticks 150
Tongue 151
Tonsillitis 152
Toxaemia 152
Travel sickness 154
Tuberculosis 155
Tumours 156
Urinary problems 156
Vaccination 158
Viruses 159
Vomiting 160
Warts 162
Worms 163
Yawning 165

REPRODUCTION

166

The Reproductive Cycle

Failure to come into heat 167
Remedies to help maintain pregnancy 167

Reproductive Disorders

Infertility 168

THE FEMALE

PRE-PARTURITION

Abortion, miscarriage, premature birth 168
Haemorrhage 169
Ringwomb 169
Vaginal prolapse 169

PARTURITION

Giving birth 170

POST-PARTURITION

Retained placenta 170
Mastitis 170
Metritis, Endometritis 172
Pyometra 172
Uterine prolapse 174
Difficulty passing urine 174
Urinary incontinence 174
Shortage of milk 174
Shortage of milk 174
Too much milk 176
Eclampsia (lactation tetany) 176
False, pseudo or phantom pregnancy 176

Contents

THE MALE

Diminished libido 177

The Newborn Animal

Reviving the newborn animal 177

HORSES, PONIES AND DONKEYS

178

Bony changes and enlargements 178

Catarrh and sinusitis 180

Colic 181

Constipation 182

Coughs and colds 184

COPD 185

Cramp 186

Dermatitis, greasy heel and mud fever 188

Diarrhoea and enteritis 189

Equine influenza 192

Hooves 194

Joint disease and conditions 196

Laminitis 198

Liver conditions 200

Monday morning leg 202

Nosebleed 204

Rheumatism 206

Sarcoids and warts 208

Skin conditions 210

Tendons and ligaments 214

Tetanus 216

CATTLE

218

Abortion 219

Abscesses and haematomas 221

Acetonaemia, ketosis 222

Bloat 224

Blood in the milk 226

Calving 226

Digital dermatitis 227

Foul-in-the-foot ('Low', 'Luer') 228

Lameness 228

Leptospirosis 230

Mastitis 231

Metritis, endometritis 234

Milk fever 236

Navel-ill (joint-ill) 238

New Forest eye disease 240

Photosensitisation 242

Respiratory problems 243

Retained afterbirth 244

Reviving the calf or adult 245

Ringworm 246

Scours, diarrhoea, enteritis 247

Staggers 249

Teat injuries and sores 250

Warts, papillomatosis 251

SHEEP

252

Abortion 253

Bloat 255

Coccidiosis 256

Colibacillosis 256

Foot-rot 258

Lambing 258

Mastitis 260

Milk promotion and suppression 260

Mineral disturbances 261

Navel-ill 261

Orf (contagious pustular dermatitis) 262

Parasites (worm infestations) 264

Contents

Retained afterbirth 279
Reviving the weakly kid or adult
279
Urinary disorders 280

PIGS

281

Abscesses (boils) 281
Anaemia 282
Blue eared disease 282
Bowel oedema 284
Constipation 285
Enteritis (diarrhoea, scours,
scouring) 286
Erysipelas (swine erysipelas) 288
Farrowing 289

Gastritis 290
Lameness 290
Leptospirosis 291
Mastitis 291
Metritis and retained placenta 291
Respiratory infections 292
Skin disorders 296
Urinary tract disorders 300
Worms, parasites 302

DOGS

303

Addison's disease 304
Anal glands 305
Ascites (dropsy) 306
Campylobacteriosis 306
Chronic degenerative radi-
culomyelopathy (CDRM) 306
Cushing's syndrome 307
Diabetes 308
Distemper (canine distemper, hard
pad) 309

Eclampsia (lactation tetany)
310
Fading puppies 312
False pregnancy 314
Grass seeds 316
Hepatitis 318
Hip dysplasia 319
Kennel cough 320
Leptospirosis 321
Osteochondrosis 323

Contents

Osteomyelitis 324
Pancreatic insufficiency 324
Parvovirus 326
Pining and grief 328

Prostate problems 329
Salivary cyst 330
Salmonellosis 330
Thyroid problems 332

CATS

333

Abscesses 334
Alopecia (hair loss) 335
Cat flu 336
Cystitis 337
Fading kittens 338
Feline chlamydial infection 338
Feline immunodeficiency virus
(FIV) 340
Feline infectious enteritis (FIE) 342
Feline infectious peritonitis (FIP)
344

Feline leukaemia 346
Fur balls (hairballs) 347
Key Gaskell syndrome 348
Kidney disease 349
Kittening 349
Miliary eczema 350
Spraying 351
Stud tail 352
Thyroid problems 353
Urinary calculus 354

BIRDS AND POULTRY

357

Accidents 358
Broken bones 358
Bumble foot 358
Chest infections 360
Chills, colds, coryza 360
Coccidiosis 362
Concussion 362
Dehydration 364

Diarrhoea 364
Feather pecking 364
Gunshot wounds 366
Oiled birds 366
Parasites 368
Salmonella 368
Skin conditions 368

GENERAL INDEX 465

REMEDY INDEX 479

Accidents, Emergencies and First Aid

ANIMAL BITES

The canine or eye teeth of animals who bite when they attack or defend themselves are very sharp and pointed. They can cause deep puncture wounds which may appear to heal quickly, but because the teeth carry bacteria on their surface, infection may develop beneath the scab causing heat, swelling and pain.

- Lacerated, large wounds; deep, painful wounds. Immediate veterinary attention necessary.
- Small bites. Use remedies, but seek advice if infection seems to be present.
- Horses. If in doubt consult a vet.

By Mouth

If the fight has just occurred and there is shock associated with the bites.

This remedy follows Aconite well, or may be used from the outset if little or no shock is apparent.

If pain is evident. The signs of pain may be loss of appetite, restlessness, dullness, panting, or constantly licking or gnawing at the affected place.

These two remedies help to reduce infection and promote healing.

Aconite 30c. Dose every 15–30 minutes up to 4–6 times as required.

Arnica 30c. Dose every 1–2 hours up to four doses, then 3–4 times daily for a few days until improved. Arnica is indicated and helpful whenever there is tissue damage, inflammation or bruising.

Hypericum 30c. Dose 3–4 times daily for 2–4 days until improved.

Calendula 6c and Ledum 6c. Dose every fifteen minutes for an hour and then 3–4 times daily for 3–5 days.

ANIMAL BITES (continued)

Application to the Wound

To cleanse the wound, apply **Calendula lotion** 3–4 times daily as necessary. To promote healing when the wound appears to be clean, use **Hypericum/Calendula Cream**. Apply 2–3 times daily until healed.

BLEEDING (Haemorrhage)

The loss of some blood after any accident or injury is natural and helps to cleanse the wound, but it should not continue for too long. A trickle of blood for 5–10 minutes is acceptable but by the end of this time the blood should have begun to form a clot. Such bleeding will be from small blood vessels and is of little consequence. Bleeding from larger vessels is much more serious and professional help should be sought immediately. Such blood may be coming from an artery or a vein.

The blood in the arteries contains oxygen and is bright red in colour. It tends to be pumped out as the heart and pulse beat. The blood from veins is being returned to the heart from the tissues and has given up its oxygen. This blood is a dark red or wine colour and tends to flow rather than pump from the injury. If the bleeding appears severe it is probably coming from a major vessel. In such a case pressure should be applied to stop excessive blood loss while help is summoned. It may simply be a pressure pad or bandage; in the case of a limb, a cord fitted tightly round above the wound (a tourniquet) will help to stop the bleeding if an artery has been damaged.

- Blood oozing or trickling. Use remedies, but seek advice if bleeding persists.
- Pumping, bright, red blood. Flowing dark, red blood. Immediate veterinary attention necessary.

BLEEDING

For shock.

Aconite 30c. Start immediately and dose every 15–30 minutes for up to 4 doses.

Use if bleeding due to an injury, or if bleeding has occurred previously and is only slight. Useful for bleeding from the tips of the ears or from the end of the tail, or any other small wound. that cannot easily be bandaged.

Arnica 30c. Dose every 4 hours for 1–3 days as required.

For dark, unclotted, persistent, but not copious bleeding.

Hamamelis 6c or 30c. Dose 3 times daily for 3–5 days.

Use when the animal is weak after bleeding a lot.

China Officinalis 30c. Dose every 4 hours for 1–2 days.

For bright, red persistent bleeding.

Ipecacuanha 30c. Dose every 30–60 minutes up to four doses, then 3–4 times daily for a day or two if necessary.

For superficial and slight haemorrhages, especially those that tend to recur but are not serious (e.g. slight nosebleeds).

Phosphorus 6c. Dose every 30–60 minutes up to four doses, then 3–4 times daily for a day or two if necessary.

General Index

Advice to the reader. Some symptoms are so common that the index can be of only limited use, unless the page number refers to a chapter. Common symptoms include: biting or scratching itself, diarrhoea and vomiting, dullness, rubbing, shock, temperature. The search for a remedy may go faster if you can also find a less common symptom.

enteritis (*see also* diarrhoea), 75–6, 134,

General Index

- 189–91, 247–8, 256–7, 264,
278, 286–7, 302, 306, 331,
342–3, 362–3, 371, 373, 382, 393,
397
- enzootic abortion, 253
- epilepsy, 84–5
- eruptions (*see also* eczema; skin conditions)
boils, 210, 281; papules, 387;
pimples, 262, 335, 350; pustules, 189,
210, 262, 296, 335, 350; scabs, 262,
350; vesicles, 262, 350
- erysipelas, 288–9, 291
- excitement, excitability, 129, 154, 183,
222, 236–7, 249, 268, 284, 298,
310–1
- exhaustion, lassitude, prostration,
tiredness, 92–3, 94, 100, 107, 154,
177
- eye conditions (*see also* conjunctivitis)
abnormalities, 344; bleeding, 344;
blinking, 241; bulging, 237; cataracts,
77, 79, 308, 401; chronic, 407;
closed, 393; discharging, 20, 292;
foreign bodies, 20; glaucoma, 78–9,
423; lifeless look, 360; pale, 26, 46,
92, 190, 264, 282; protruding, 377;
pupils dilated 77–9, 240–5, 401; red
surround 240; running, 44; 58, 78,
88–9, 138, 192, 336–7, 340, 373;
sensitive to light, 78; shut, 241; sore,
336, 379, 415, 423; 'staring', 237;
streaming, 147, 337; tears, 78, 240–1;
tumours, 346; ulceration, 240, 336;
watering, 78
colour: black, 21; bloodshot, 338;
blue, 318, 326; cloudy, 344;
discoloured, 182; red, 21, 77–8,
338–9; white film on cornea, 240–1;
yellow, 97, 100, 190, 200
- eye injuries, 20–1
eyelids: closed, 360; protrude, 216;
swollen, 115, 213, 284, 339, 393,
400; third eyelid visible, 348
colour: blue, 288; yellow, 277
- face, puffy, 26
- fading
kittens, 338–9; puppies, fading puppy
syndrome, 312–3
- faeces (*see also* diarrhoea)
balls, 181; bloody, 64, 70, 76, 134,
161, 182–3, 190–1, 220, 247–8,
256–7, 278, 284, 286–7, 325, 327,
329, 330; explosive, 191; 'fatty'; 324;
too firm, 285; foul-smelling, 76, 191,
220, 287; frequent, 306; hard, 64–5,
181, 182–3, 222, 236; knotty, 183;
liquid, 70, 75; loose, 100, 201, 220,
247–8, 257, 277, 278, 284, 286, 363,
354; lumpy, 65; noisy, 76, 191, 287;
offensive, 134, 201, 247; profuse, 76,
191, 287, 306; ribbon-like, 329;
runny, 286; slimy, glazed or mucus-
covered, 64, 76, 182, 191, 201, 222,
257, 363; soft, 147; tarry, 285;
watery, 63, 76, 134, 190–1, 248,
256–7, 286–7, 306
colour: black, 65; brown (pale, light),
76, 97, 191, 277; clay-coloured, 107;
dark, 285; dry, 183, 222, 236;
greenish, 257, 277; grey, 256–7;
yellow, 97, 100, 257, 277
eating faeces, 324
- falling over, 122, 249
- farrowing, 282, 289–90
- feather pecking, 364–5
- feathers
ruffled, 360, 362; fluffed up, 360
- fear (*see also* anxiety), 80–1, 129,
383
- feet, cold, 236, 245
- feline
chlamydial infection (*see*
conjunctivitis), 338–9; coronavirus,
344–5; distemper, 342–3,,
dysautonomia, 348;
immunodeficiency virus (FIV),
340–1; infectious enteritis (FIE),
342–3; infectious peritonitis (FIP),
344–5; influenza, 336–7; leukaemia,

General Index

- 346–7, lower urinary tract disease (FLUD), 354–5; parvovirus (FPV), 342–3; penleucopenia, 342–3; urological syndrome (FUS), 354–5
ferrets, 371–4
fever, 55, 64, 82–3, 105, 127, 134, 136, 150, 171–2, 191, 192–3, 199, 285, 321, 324, 337, 346, 370, 406, 410, 428
fibrositis (*see* rheumatism)
fighting, 281
‘fin rot’, 376
fish, 375–7
fistula, 305, 312
fits, 84–5, 309
flanks, tense or hard, 60
flatulence, 53, 60, 62–3, 86–7, 97, 181, 201, 247, 277, 324–5, 413
fleas, 6–7, 140–1, 163, 335, 347, 350, 373, 390
flu, 88–9, 282
 cat, 336–7; cow, 248; equine, 192–3; ferrets, 373; hamsters, 386; swine, 293
fluke infestation, 376
‘fly strike’, 390
foaling (*see* parturition)
food
 intolerance, wrong food, too much, over-lush pasture, 62, 63, 190, 222, 224, 248, 261, 276–7, 280, 286, 302, 323; refusing, 328; unable to eat, 342
foot and mouth (*see* virus)
‘foot-rot’, 252, 258–9, 279, 373
‘foul-in-the-foot’, 227, 228–9, 279
fractures (*see also* first aid), 12–3, 358–9, 428
fright (*see also* anxiety), 406
fungus, 246, 376
 Microsporum, 298; *Trychophyton mentagrophytes*, *T. verrucosum*, 298
fur (*see also* hair)
 balls, 347; chewing, 370; coarse, 332, 353; dry, 324, 379; ‘moth-eaten’, 370; rough, 379; ‘slip’ (*see also* alopecia), 370; sparse, 332, 353
furunculosis, 141, 144
‘gagging’ (*see also* retching), 152, 184
gasping (*see* breathing)
gastritis (*see also* vomiting), 90–1, 290
gastroenteritis, 264, 290
gerbils, 378–80
German Shepherd syndrome (*see* CDRM)
gingivitis (*see* gums)
glands
 lymph: enlarged, 202, 340, 346, 382; mammary: hot, inflamed, painful, swollen, 110–111; knotty, 111, pseudopregnancy, in, 314; thyroid, swelling, 353
gnawing, (*see* bites itself)
goats, 273–80
goitre, 353
gonitis, 197
grass seeds, 316–7
grass tetany (*see* staggering, ‘staggers’)
‘greasy heel’ (*see* dermatitis)
grief, grieving, 328, 351, 421
groaning, grunting, 120, 182, 224, 236
groin, lesions, 350
grooming, excessive, 335, 347, 350
growth, poor (*see also* failure to thrive), 282, 292, 302
guinea-pigs, 381–4
gumboils (*see* abscesses)
gums, 52, 90–1, 148
 bleeding, 149; blue, bluish, 18, 126, 177, 245, 288; inflamed, 52, 148–9, 340–1; pallor, 26, 35, 46, 92, 282; receding, 149; spongy, 149; swollen, 151; yellow, 97, 190, 277
gut oedema (*see* bowel oedema)
haematomas (*see also* bruises), 14–5, 74, 221
haemorrhage, 46–7, 169
hair (*see also* fur)

General Index

- loss, 16, 87, 102, 132–3, 140–1, 144, 298, 335, 332, 335, 352, 353, 379, 384, 387, 395, 396, 399; matted, 210, 212, 347, 352; new, 242
- hairballs, 347
- halitosis, **52–3**, 91, 102, 113, 148, 153, 222
sweet, 222, 321
- hamsters, **385–8**
- hard pad, **309**
- head
hanging, 393; held high, 268–9;
injuries, **22–3**; pressing, 222; shaking, 72, 236; to one side, 316, 397; turns from side to side, 387; wing, under, 360
- healing, slow, 352
- haematomas, **221**
- heart
conditions, **92–3**; endocarditis, 288;
failure, 326, 377; increased rate, 332, 353; palpitations, 26; slow rate, 236, 332, 353
- heat
coming into (oestrus), 167;
termination, 374
- heatstroke, **24–5**, **278**, 298–9
- hedgehogs, **389–91**
- hemiplegia (*see* paralysis)
- hepatitis (*see also* liver conditions;
Rubarth's disease), **94**, 158, 200, **318**
- hibernation, 390
- hives (*see* nettle rash)
- hocks, sore, 395
- hooves, **194–5**
corns, 194; heat, 198; necrosis, 258;
puncture wounds, 194–5; rings, 198;
sanderack, 195; seedy toe, 195;
thrush, 194–5
- horses, ponies, **178–217**
- huddled together, 362
- hunched up, 365, 380, 398
- hunger, 324
- husk (*see* bronchitis)
- hygroma, 197
- hyperadrenocorticism, **307**
- hyperplasia, 353
- hyperthermia, 298–9
- hyperthyroidism, hypothyroidism, 332, 353
- hypoadrenocorticism, **304**
- hypocalcaemia, **236–7**, **261**, 310
- hypoglycaemia, 222
- hypomagnesaemia (*see* 'staggers')
- hypothermia (*see* chilling)
- hysteria, **84–5**
- immobile, 82, 387
- immunodeficiency, 340–1
- incontinence of urine, faeces, 18, 28, 69, **84**, **95–6**, 102–3, 122–3, 136–7, 174–5, 249, 307, 348, 351, 414, 424
cats, cattle, dogs, horses, **95**
- incoordination, 222, 371
hind legs, 284, 307
- indifference, 173, 315
- indigestion, **97**, 276–7
- inertia, uterine, 290
- infection (*see also* wounds), **36–7**, 75, 279, 292, 296, 301, 410, 417, 427
bacterial, 247; *Bordetella*, 292;
Pasteurella, 292
- infectious
canine tracheobronchitis, 320;
keratitis **240–1**
- infertility (*see* reproduction)
- inflammation, **98–9**, 239
udder, 231; uterus, 234
- influenza (*see* flu)
- injury (*see also* wounds), **20–1**, **22–3**, 79, 96, 98, 102, 203, 205, 214–5, 251, 279, 408
- insects (*see* bites, stings)
- irritable, 144, 149
- irritable bowel syndrome (IBS) (*see* colitis)
- itch, 376
- itching, 26–7

General Index

- jaundice (*see also* liver conditions), 94, **100–1**, 107, 156, 190, 200, 242, 318, 321, 344
- jaws, clamped or locked, 216, 261, 268
- jerking, 123
- joints (*see also* arthritis, tendons), **30–2**, 50–1, **196–7**, 238–9, 323, 426
- deformed, 51; enlarged, 121; hot, 51, 239; joint-ill, **238–9**, painful, 206, 337, 384; stiff, 130; swollen, 51, 196, 239, 384; thickened, 323
- kennel cough, **320**
- ketosis (*see* acetonæmia)
- Key Gaskell syndrome, **348**
- kicking itself, 60, 120, 182–3, 224
- kidding, **278**
- kidneys, 52, 68, 75, **102–3**, 105, 150, 152, 300–1, 304, 308, 321, 340, **349**, 402, 406, 419, 420
- kittening (*see* parturition)
- knuckling, of feet, 307
- labour, 168
- lactation tetany, **310–1**
- lambling, **258–9**
- lambling sickness, 261
- lameness (*see also* arthritis, bruising, rheumatism, sprains), **104**, 130–1, 179, 188, 194–5, 196–7, 206, 214, 227, **228–9**, 258, **279**, 280–1, **290–1**, 316, 319, 323, 366, 390
- laminitis, **198–9**
- 'lamppost disease' (*see also* dogs), 105, 321
- Leptospira*, leptospirosis, 100, **105**, 158, 219, **230**, **291**, 321–2
- lethargy, 288, 332, 353
- libido, diminished, 177
- lice (*see also* dry eczema), **106**, 140–1, 296–7, 384
- licking (*see also* wounds), 9, 27, 33, 36, 38, 52, 70, 108, 132, 140–1, 188, 222, 335, 350, 351
- lifeless-looking, 387
- limbs, grass seeds in, 317
- lips
- blue, 126; swollen, 151, 212
- listeriosis, 254, 274, 370
- listless, 144, 153, 293
- liver (*see also* hepatitis, jaundice), 52, 75, 94, **106–7**, 165, 190, **200–1**, 269, 277, 306, 321, 419
- enlarged, 307
- 'low', 'luer' (*see* 'foul-in-the-foot')
- 'lumps', 382
- lungworm, 294–5
- luxation, 319
- lying down, 182–3, 186, 231, 236, 245, 261, 276, 278, 284
- lymphocytic choriomeningitis (LCM), 397
- lymphocytosis (*see* virus)
- lymphosarcoma, 346
- maggots, 390, 402
- malaise, 324
- mammary glands (*see* udders), 166, 402
- mammitis (*see* mastitis)
- mange, **108–9**
- mastitis, **110–1**, 166, 170, 220, 226, **231–3**, 250, **260**, 262, **291**, 292, 383, 393, 397
- medicine, overuse of, 75, 190, 212, 382
- metritis, endometritis, 172–3, 219, **234–5**, 244, 291, **292**, 374
- mice, **396–9**
- milk, 174–6, 260
- bloody, 226, 260; clotted or flaky, 231, 260; discoloured, 231; loss of, 282; promotion, suppression, 260; pseudopregnancy, in, 275, 314; watery, 231, 260; yield, drop in, 219, 222, 227, 230, 244
- 'milk fever', **236–7**, 244, 249–50
- mineral disturbances, **162**
- miscarriage (*see* abortion)
- mites, 373, 379, 380, 384, 391, 393, 395, 396

General Index

- Sarcoptes scabiei*, 296
 'Monday morning leg', 202–3
 mouth (*see also* gums, teeth), 112–3, 420
 bleeding, 127; bluish, 326; dry, 112, 113, 331, 348; foaming, frothing, 84, 249, 261; inflammation, 340; 'mouth rot', 403; sore, 379; ulcers, 336; watery, 256–7; yellow, 100, 200
 move, reluctance to, 198, 268, 283, 288, 293, 326, 384
 mucous membranes (*see also* gums; eyes; skin)
 bluish, 326; pale, 318; red spots, 318
 mucus overproduction, 98–9
 mud fever (*see* dermatitis)
 muscles
 damage to, 186; hard, 123, 186; painful, 186, 206; pulled, 121; spasm, 310; stiffness in (*see also* stiffness), 14, 130; swelling, 14; trembling or tremors (*see also* twitching), 216, 236, 249, 261, 266, 268, 284, 312; wasting (*see also* main entry), 307; weakness, 51, 200, 304, 307, 332, 353
 muzzle, dry, 236
 mycoplasma, 220, 254, 274
 myositis (*see* cramp)
 myxomatosis, 393

 nails, 114–5
 nausea, 154
 navel
 hot, 239; navel-ill, 238–9, 261; swollen, 238–9
 neck
 arched backwards, 269; extended, 264; twisted, 379
 necrobacillosis, 395
 neonatal mortality, 312–3
 neoplasms, neoplasia (*see* tumours)
Neospora caninum, 220
 nephritis (*see* kidney disease)
 nettle rash (*see also* allergies, skin conditions), 44, 114–5, 212–3, 406, 431
